

RISE BEFORE IT'S TOO LATE....

AMIA HAFSA URDU FORUM

American-backed mujahedeen used to carry out raids on the Russians that were during the cold war and now America is trying to kick them out from Afghanistan. Pakistan turned into the ally of America in the Afghan war, Pakistani people sacrificed their lives, and Pashtoons from tribal areas; whole heartedly offered their services to the Afghan brethren in the 1979 Afghan War. There was a wholesome aura created by U.S. agencies, and the present “Militants” were labeled as the “holly warriors”, “knights”, the “genius souls” on earth, they

were provided with modern ammunition: to teach a lesson to the infidels, but after U.S victory every thing ends up in smoke. For a second time America insisted Pakistan for help in the Operation Enduring Freedom in Afghani soil, Pakistan presents their borders and said we are against your enemies My Lord. We are the eyewitnesses, how U.S waged this operation and how the ashes start falling on the Pakistani ground. We have just closed our eyes, without care what the wretchedness is just about in Afghanistan, how they would be tackling the U.S Daisy Cutters and what would be their emotions when they got truth that most U.S bomber flew from their Muslim brethren land “the land of pure” and then this curse start penetrating toward Pakistani Tribal Areas.

The 40 million Pashtoons have never recognized any imperial power to rule over them as they are the world’s largest tribe. The Tribal Areas of Pakistan consist of seven Agencies, these are Khyber, Kurram, Bajaur, Mohmand, Orakzai, North and South areas of Waziristan and six FRs (Frontier Regions). The tale of tribal area is gruesome as they have no moment of relief. We can see them in Afghan war 1979, in the War on Terrorism and now in their own cities and streets. US-led forces in Afghanistan are moving toward Pakistani territory to destroy Taliban and other extremist groups, if Islamabad is unable to do so.

U.S. wrecked havoc in Afghanistan and her perfidious

mockery left the Afghani people in the acute disastrous. Now it's seemingly looks Pakistan's turn in a little while (God forbid), Pakistan had paid huge cost in the face of disorder in tribal areas. America after much hunt, when quenched its thrust from the blood of Afghani Muslims; started the blame game that Taliban are now in the tribal areas of Pakistan. The calm and peaceful natives of tribal areas are jolted by U.S. spy planes and the Pakistani government also holding operations, where to go? Pakistan is engulfing by the war clouds, Tribal areas of Pakistan in the present milieu are facing its worst time.

Quran highlighted the fakeness of infidels as they can never be the friends of Muslims and the heinous policies of West are not out of our sight. With constipated face U.S. pushed Pakistani government to eradicate those entire fundamentalist which can pose threat for U.S. hegemony and become their head ach. Government hardly pay any attention on there rural areas. The system of administration has not changed much, even 61 years after Pakistan's independence despite demands by the educated and enlightened sections of the tribal population. The courts and police have no jurisdiction in tribal areas, a unique set of laws called the Frontier crimes Regulations (FCR) enforced in tribal areas since 1947, empowers the government to arrest anyone without specifying the crime. Low literacy ratios, scarce development funds, fall-out the instability in neighboring Afghanistan kept the tribal areas lagging in term of socio-economic uplift compared to the rest of Pakistan. There is much stress from

the U.S. government as they smelled “Osama is in Pakistan” in the mountainous region. Through the classic carrot and stick approach, the government promised special development funds for the tribal areas and warned them the possible aerial strikes by American warplanes to hunt down Al-Qaieda. In obedience of west, Government of Pakistan has launched an operation against the militants of tribal areas and the U.S. drowns are dropping their love letters.

We are butchering our own innocent brethren in the façade of WOT "War on Terror" and compelling them to stand against us. By calling some dissident group as Taliban, we are snatching the basic necessities of life from the poor dwellers of Tribal Areas. How they will be surviving in this cold and during the Curfew, how they were managing to meet their needs, it's not easy to unite simultaneously the body and soul in harsh condition. Where is justice in it all?

Why our government is waving the Red Flag? It's better to stride for conflict resolution, sit around the table of dialogue and stop manufacturing the storm on the cup of tea. Our enemies are making stannic plan and their motto not much changed after six decades “divide and rule”. Under the shatter hoops, in the debris of one's sweet home, beseeched hearts of mothers, the empty stomachs of kids, screams of widows, the weeping eyes on the pieces of dead bodies, the smell of Red Blood really are enough to made one mad, creating the dooms day scenario, and can compel one to take revenge. For God sake stop this stannic dance and we can not resist any more

this gory drama of death and destruction, we are on the verge of war. Now we ought to be careful about the every split second because it is taking us near to a painful story, we are in the nut cracking situation, from one side United State of America pushes Pakistan and on the other corner Indian vampire RAW is hunting and sucking our blood. Some one rightly said "It is courage the world needs not infallibility. Courage is always the surest wisdom" and now our government have to become the personification of "this" courage and should say good bye to the policies of DO MORE--- otherwise--- May Allah Bless Pakistan. (Ameen)
